

```
1) const employees = [  
  { employeeId: 11, name: 'John', managerId: 11 },  
  { employeeId: 50, name: 'Todd', managerId: 73 },  
  { employeeId: 150, name: 'Alex', managerId: 200 },  
  { employeeId: 73, name: 'Sara', managerId: 11 },  
  { employeeId: 200, name: 'Alex', managerId: 50 },  
  { employeeId: 100, name: 'Alex', managerId: 150 },  
];
```

Display employee details whose managerId 11

Delete the objects from array whose employeeId 150.

2) Given a string, reverse each word in the sentence

For example Welcome to this Javascript Guide! should be become emocleW
ot siht tpircsavaJ !ediuG

3) Design a virtual alphabet panel. And display. When the user click on
key it should add to display text and also add space, clear, and
backspace buttons.

4) Let a=[2,3,4,5,6,6,7,8,9,2,9]

- i) Double even elements from array by using map.
- ii) Extract only even numbers using filter.
- iii) Sum all the numbers using reduce.
